Lori,

Oh wow! Thank you so much! I can let you know how we do if you want (all the final project groups compete against each other in a design competition).

Hello Razik,
Thank you for your interest in Serpac. I have scheduled two 272 in black to ship on Monday. Good luck with your project!

Lori

How did you hear about us: Classmate

Inquiry: Hello, my name is Razik Ahmed, and I am a electrical engineering student at the University of Texas at Austin. I am working on the final project for an embedded systems class. We need to create a system that performs a specific purpose of our choice. The system that my partner and I are making is multi-player battleship using two different modules that communicate via either Zigbee wireless modules or a serial cable. Because of our required dimenstions, the enclosure that we would like to use is the S series 272, although any of the S x72 enclosures will work. We do need one for each of the two modules, but if you have any of these enclosures to share, we would greatly appreciate it. Thanks!
